Engineering Plastics China News

China becomes the large production base of engineering plastics at present. The growth rate of engineering plastics in China is three times of that of national GDP at present.

The demand of Top Five engineering plastics is predicted to swell to 2.24 million tonnes in 2008, which growth rate reaching 20% due to the fast development of the pillar industries like electronics, auto. They both are the Rising Sun Industries encouraged by government. While 30% of engineering plastics in China is consumed by electronics and 10% by auto, so they drive the demand of Chinese engineering plastics flying.

The degree of self-sufficiency of Chinese engineering plastics is just 40%. Its supply gap is huge. Therefore western producers like GE, DuPont, DSM, etc. are focus on the Chinese market and want to enlarge their capacities of engineering plastics in China in recent years.

How do the Chinese and overseas manufacturers prepare to catch this opportunity now? How to establish win-win relationship with supplier? How to grasp governmental policy and guide?

CCM will provide all answers in **China Engineering Plastics News**. Our exclusive intelligence will assist your investment running well in Chinese engineering plastics market.

Engineering Plastics China News brings you the latest industry information including improved manufacturing techniques, new raw material and products, new legislations and standards, and the low-down on the mergers and business deals that are shaping the market.
